About Us

Established in 2009 and ISO certified, Simplex specializes in manufacturing high-definition steel windows and doors crafted from international-standard GI, setting the benchmark for durability and design in residential and commercial projects.

Headquartered in Kerala, India, Simplex is an ISO-certified specialist established in 2009, dedicated to supplying branded, international-quality GI steel windows and doors for diverse architectural applications

Since 2009, Simplex has manufactured and supplied branded, ISO-certified, high-definition GI steel windows and doors that conform to the highest international quality standards..

Vision & Mission

To be the premier choice for architectural excellence by crafting high-performance, handcrafted

steel windows and doors that seamlessly blend industrial grade durability with timeless aesthetic elegance.

light filled aesthetic for the modern era.

Production

Our production process operates in strict adherence to rigorous industry standards. We leverage state of the art manufacturing technology, including Precision CNC Machinery. ensuring every component is crafted with absolute accuracy and consistency.

This superior material is combined with the skill of our highly trained labor force and advanced manufacturing practices to create products that are not just windows and doors, but architectural statements.

The unique properties of our raw materials and high-quality accessories allow us to deliver stunningly attractive, durable, and functional fenestration solutions

Why Choose Simplex ?

Built to meet contemporary construction standards, Simplex windows provide excellent structural stability, low maintenance requirements, and lasting reliability.

CNC Precision Engineering

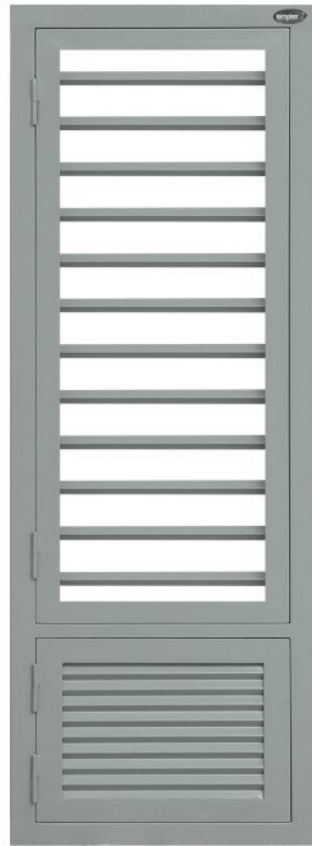

Advanced CNC technology ensures flawless accuracy, consistent quality and perfectly crafted steel windows

Resulting in superior finish, better fit, and long-lasting performance.

Type of Fixing

Fixings are used to hold things together or to attach them to the surfaces such as walls, floors or roof. They are a Form of connectors

Following Standards Are In Offering

Designed in compliance with modern construction standards, ensuring superior strength, durability, and long-term performance in every application.

SHEET CLAMB

MATERIAL - GALVANIZED IRON

Sheet clamps are similar to locking clamps except they have a large surface area at the clamb jaws which make them ideal for clamping to wall or bricks

T-TYPE CLAMB

MATERIAL - GALVANIZED IRON

T-type clamb are the fasteners for providing the best fixation to objects. It stands out in terms of providing high strength. it only used for rod pipes comes with heavy load

ANCHOR BOLT

MATERIAL - GALVANIZED IRON

Anchor bolts are typically used to attach steel to concrete. One end is embedded into the concrete while the opposite end is threaded to attach structural support. Its is mainly used in the fully finished area

Since 2009, Simplex has manufactured and supplied branded, ISO-certified, high-definition GI steel windows and Doors that Conform to the highest international quality standards.

Accessories

Our accessories are crafted to enhance performance, provide added security, increase energy efficiency, and deliver long-lasting value Find the perfect additions to elevate your home or project.
